

BLACK DIAMOND

Low-VOC Urethane Basecoat

- MEETS ALL CURRENT VOC REGULATIONS FOR BASECOATS, INCLUDING RULE 1151 (3.5 lbs/gal)
- AVAILABLE IN 65 BEAUTIFUL FACTORY-PACK COLORS
- ACTIVATED URETHANE BASECOAT TECHNOLOGY PROVIDES UNSURPASSED ADHESION, CHIP RESISTANCE AND FILM INTEGRITY
- MIXES 4:1 WITH UNIVERSAL LOW-VOC ACTIVATOR

Kirker's most advanced color system, the BLACK DIAMOND Series Low-VOC Urethane Basecoat provides the ultimate performance and durability, while ensuring compliance even in areas with the most stringent VOC limits.

This unique two-part system sprays like a conventional air-dry basecoat, but provides better adhesion and filling capabilities with vastly improved film integrity. It is far easier to use than finicky waterborne basecoats, especially for shops working in less-than-ideal conditions with limited control over temperature, humidity, air movement and other factors.

Performance benefits include exceptional atomization and outstanding metallic control. This innovative basecoat also provides quick two-coat coverage and seriously fast dry times. Ideal for complete repaints, custom refinish, restoration work and even repair jobs.

Refer to Technical Data Sheet (available online) for more specific mixing and application directions.

BLACK DIAMOND

Low-VOC Urethane Basecoat

From cool classics to the most modern metallics, Kirker's BLACK DIAMOND Series Low-VOC Urethane Basecoat has a color for just about every application. And by blending different colors, adding Diamond Pearl Series midcoats or topcoating with the SPECTRA Series urethane candies, there's no limit to the color pallet available.
