

# **SPECTRA Series**

## Urethane Candy Colors

- AMAZINGLY VIBRANT PURE TONE CANDY COLORS
- LIGHTFAST PIGMENTS WON'T FADE OR "SUNBURN" LIKE OTHER CANDY SYSTEMS
- NO BLEEDING BETWEEN COATS MEANS LESS TIME AND LESS MATERIAL
- MIXES 4:1 WITH CANDY SYSTEM ACTIVATOR (0175)
- NATIONAL RULE COMPLIANT

This innovative custom refinish system combines vibrant pure-tone candy colors made from premium raw materials with advanced high-solids urethane coating technology, in a simple, user-friendly design.

Whether used for overall refinish or detailed accent work, the brilliant SPECTRA Series candy colors will make any vehicle stand out from the crowd. So, whether you're painting a rad roadster or a classic low rider, a custom chopper or a modified import, it's now easier than ever to get that awe-inspiring, jaw-dropping, head-turning, make-your-friends-jealous custom paint job you've always dreamed about.

Best of all, Kirker's SPECTRA Series comes in at half the cost of other candy systems... because it shouldn't cost a fortune to make a car look like a million bucks.

Refer to Technical Data Sheet (available online) for more specific mixing and application directions.

## **Urethane Candy Colors**

---

The SPECTRA Series is made with a unique pigment system that delivers the same crystal clear candy effect that other products feature, but since it's not made from dyes, there no need to hide your work from the sun. Dyes tend to break down quickly once exposed to harmful UV rays, causing many candy jobs to fade and appear washed out after just one or two years. Those other candy systems can also be tough to work with, requiring intercoat clears to lock down each coat of candy to prevent the dyes from bleeding into the next.

Kirker's candy system is super durable and incredibly user-friendly. It is simple enough for novice painters, yet delivers beautiful show-quality results required by the most sophisticated custom paint shops.
